BEFORE WE  
EXPECT TRUST FROM  
OUR CUSTOMERS,  
WE PROVIDE EVIDENCE  
*that's us!*

## ENVIRONMENT & SUSTAINABILITY *that's us!*

Sustainable management and careful use of resources are a matter of course for us and part of our corporate philosophy. This basic idea is consistently integrated and lived in our work processes.

We are proud to be the first certified manufacturer of partition systems and lockers in Germany to operate according to the FSC™ and PEFC guidelines.

### PEFC - registered

We pay attention to a sustainable supply chain in which our products are procured under ecological, economic and socially just aspects.

### FSC™ - certified

As the first certified manufacturer in the area of partition systems and lockers in Germany, we make an active contribution to the protection of our earth with this future-oriented procurement method. We supply almost our entire range from sustainable wood in accordance with the specifications of the FSC™.

On request  
the products are  
available with  
FSC™ certification

## MADE IN GERMANY *that's us!*

Our products are manufactured for you at the company site in Horhausen, Rhineland-Palatinate. This is the only way we can guarantee the high quality standards we set for our products.

## PREQUALIFIED *that's us!*

We are registered in the list of prequalified construction companies with the number 010.049740, proving that we are qualified for the products and services we offer.

## INNOVATIVE & DESIGN-ORIENTED *that's us!*

With our design-oriented and innovative products, we convince not only our customers, but also national and international committees.

**Schäfer toilet cubicles for ships - the first choice for public sanitary facilities at sea!**

The Schäfer NAVIC and EF-3 toilet cubicle systems have been specially developed to meet the high demands of public sanitary facilities on ships of all kinds: A stable and robust design for trouble-free continuous operation, a unique design and the use of materials that fulfil the high requirements for fire protection and ship certification. In developing these types, we have incorporated our many years of experience in equipping ships of all kinds to offer our customers a perfect product.

## NAVIC - the perfect choice for the highest demands

The Schäfer toilet cubicle type NAVIC meets all the requirements of a modern sanitary room at sea. A 30 mm thick sandwich construction with a core made of aluminium honeycomb, a surrounding aluminium frame for effective edge protection and a cover layer of 2 mm aluminium on both sides make this system an extremely stable and durable system. As a decorative cover, laminates from all manufacturers can be used. The freedom of interior architects and designers is supported in a perfect manner.

Schäfer toilet cubicle type NAVIC

Schäfer toilet cubicle system type NAVIC. High-quality materials guarantee longevity, trouble-free continuous operation and a pleasant sanitary experience. Exactly what guests and operators expect. By choosing different colours and decors, design accents can be set. The combination of coloured surfaces and the cool elegance of aluminium and stainless steel are perfectly matched.

NAVIC cubicles, which are attached to the ceiling, increase privacy in the washroom and thus create more comfort and well-being for users. The opening in the floor area ensures good ventilation.

NAVIC ALTUS cubicles, which are completely closed from floor to ceiling, create maximum privacy. By using only 30 mm thick elements, the space required for the walls is optimized and the user enjoys more free space in the toilet cubicle. The top panel above the door ensures that elements on the ceiling, such as smoke detectors or lighting, are not affected when the door is opened. The minimal weight of the elements is another advantage of this system.

EF-3 Marine ALTUS WC cubicles are characterised by their flush-mounted fronts, in which no profiles are visible. This allows the selected HPL decors to be shown to their best advantage. In addition to the unusual design, privacy for users is the main advantage of this cubicle system. The variant shown here with the top panel above the door has the advantage that elements that are attached to the ceiling are not affected when the door is opened. The minimal weight of the elements is another advantage of this system. Please note that due to IMO certification requirements for type EF-3, only a limited HPL decor selection is possible.

Save space and weight with our toilet partition solutions for the marine industry.

With our floor-to-ceiling, prefabricated WC partition wall systems, you achieve numerous advantages compared to conventional C-Class walls

- Significant weight reduction by up to 50%
- Space saving of almost 30%
- Quick assembly on board thanks to prefabricated elements
- Significantly less expensive solution
- Elegant and smooth design

	C-Class wall	Schäfer type NAVIC	Schäfer type EF-3 Marine
Thickness	50 mm	30 mm	36 mm
Weight per sqm (including doors)	36 kg	13 kg	13 kg
Weight for 4 cubicles	636 kg	296 kg	296 kg

For a typical sanitary room with **4 WC-cubicles**, with a **room height of 2.700 mm**, the **weight saving is approx. 300 kg!**

The variant of the EF-3 Marine ALTUS WC cubicle shown here is characterized by its full-length doors. This creates a very special design in the room. Please note that due to IMO certification requirements for type EF-3, only a limited HPL decor selection is possible.

## Very special!

The maximum of exclusivity and individuality can be achieved by designing the surface in accordance with your requirements, thus turning your sanitary area into a unique showpiece. Special constructions are an exciting and challenging opportunity for us. Please note that due to IMO certification requirements for type EF-3, only a limited HPL decor selection is possible.

(1)

(2)

(3)

(4)

The Schäfer toilet cubicle type EF-3 Marine is the perfect choice when it comes to design, individuality and creativity. The system consists of a 36 mm thick sandwich panel with an internal aluminium frame, a filling of aluminium honeycomb and on both sides cover layers of 3 mm thick solid grade laminate. Rebated internal aluminium profiles make the system absolutely flush. Please note that due to IMO certification requirements for type EF-3, only a limited HPL decor selection is possible.

**(1)** Solid grade laminate can be provided with individualized digital printing for a very special design. The motif selected by the interior designer is pressed into the laminate during production, so that a very resistant surface is created.

**(2) - (4)** Also, on the panels of the wall coverings an individual motive can be realized. As a result, completely new room concepts can be created, and guests can enjoy a unique experience. A sanitary room to remember very positively.

(1)

(2)

The toilet cubicle system EF-3 Marine consists of 36 mm thick sandwich panels with 3 mm thick solid grade laminate panels on both sides and an internal aluminum frame. The inside filling of the elements is done completely by aluminium honeycomb. That achieves an extremely stable and robust construction. The door rebate is done by the interior aluminum frame with a rubber profile guarantees a silent door closing. All profiles are anodized in natural color (E6/EV1), the complete system is absolutely waterproof. Please note that due to IMO certification requirements for type EF-3, only a limited HPL decor selection is possible.

**(1) + (2)** Cubicle system EF-3 type 1 with stainless steel handle. The best opportunity for ships. The door will be closed by self-closing hinges. The lock with bolt and latch will avoid moving doors.

The cubicle system type EF-3 Marine JUMP impresses with its floating look. The recessed feet and the recessed headrail in combination with the wall connections as shadow gap, form a unique appearance. All parts are corrosion protected, so that the entire construction is waterproof. Not far from the standard, and yet a highly exclusive product. Please note that due to IMO certification requirements for type EF-3, only a limited HPL decor selection is possible.

# Schäfer toilet cubicle details

- (1) Aluminium support with cover rosette.
- (2) Stainless steel support with cover rosette.
- (3) All doors are equipped with door handles and a lock with bolt and latch. This ensures, that even during heavy ship movements, the doors will stay closed.
- (4) A noise reducing rubber lip profile, integrated into the door profile ensures a silent door operation.
- (5) Aluminium self-closing hinge with high-performance polymer inserts. These inserts ensure, that no maintenance is required and that doors will close quietly and automatically even after years of operation.
- (6) All Schäfer cubicles for ships are filled with a certified aluminium honeycomb.
